
Combining Agile Methods with PRINCE2™ Workshop (AGL+P2)

Workshop Overview

This workshop covers the hybrid approach of running a project using a combination of agile techniques and PRINCE2™ in tandem. The relative merits of the approaches are explained as well as the rationale for integrating them.

Workshop Objectives

To give delegates an overview of integrating Agile techniques and PRINCE2™. To familiarise delegates with the advantages of integrating the two methods and the techniques used.

Who will the workshop benefit?

Delegates looking to run PRINCE2™ projects in a more agile way or delegates looking to bring more rigour and governance to their Agile capabilities. The workshop would also benefit personnel at either a programme or strategic level investigating alternative approaches to project delivery.

Pre-requisites:

Some familiarity with PRINCE2™ or similar approach would be desirable.
