

DSDM Atern Awareness (DSDMA)

Course Overview

The course covers the theory and rationale behind DSDM Atern. Throughout the course all areas of DSDM Atern are explained and insights are given into how they work in practice. A particular emphasis is placed on the techniques used by DSDM Atern. Delegates receive a DSDM Atern Pocketbook.

Course Objectives

To give delegates a solid understanding of DSDM Atern. It will enable them to understand how DSDM Atern can be applied in general and how it could benefit their own specific role on a project.

Who will the course benefit?

Team members who are involved in a DSDM Atern project. Typical roles would include Project Manager/Team Leader, Business Analyst, Solution Developer and Solution Tester/Quality Reviewer. It would also be of benefit to business stakeholders who would be part of a DSDM Atern Development Team.
