## Estimation Fundamentals (ESTM)

---

### Course Overview

Estimation is one of the hardest things to get right on a project. This course investigates several techniques and uses practical exercises to gain an understanding of how they work and when to apply them. All delegates receive a pocketbook full of tips and techniques.

### Course Objectives

To give delegates a solid understanding of estimation from a practical as well as a theoretical viewpoint. This course will enable delegates to use estimation techniques on traditional or agile projects.

### Who will the course benefit?

The course is aimed at anyone involved in the estimation process on a project. It is particularly suited to Project Managers and Team Leaders, and is also appropriate for those involved in the delivery of any element of a project.

### Pre-requisites:

None

### Course Content

- What is an estimate?
- Estimation basics
- Factors involved in an estimate
- Simple estimation techniques
- Advanced estimation techniques
- Planning and Measurement
- Going forward with estimation

Duration: 1 day non-residential
